2018-10-12 Join The Republic with Exclusive ROG X Call of Duty®: Black Ops 4 Gaming Gear ROG Black Ops 4 Products Include Unique Styling, Custom AURA Integration, and Come Bundled with Digital Standard Edition of the Game for PC. Call of Duty®: Black Ops 4 is optimized for PC and we've collaborated with Activision to give the ROG community a totally unique experience that's only possible with Aura Sync-enabled hardware*. When playing Call of Duty®, your RGB ...[READ MORE](#) Page 2 Description Highlight Synchronize lighting with ASUS Aura Sync-enabled gear to perfectly illuminate your battlestation 360-degree lens adjustment, ensuring the ROG logo is always positioned upright Magnetic base for easy attachment to any metal surface Republic of Gamers (ROG), part of the ASUS family, is dedicated to creating innovative hardcore gaming hardware for gamers. ROG is committed to providing the absolute best performance and quality from its complete line of products. ROG is for those keen on the finest gaming hardware and software, it enables the ultimate computing experience for gamers and enthusiasts worldwide. All the while incorporating a stylish gamer-focused design merging the excitement of gaming with a unique premium style ROG Spotlight ROG Spotlight USB logo projector with Aura Sync RGB LED Synchronise lighting with ASUS Aura Sync-enabled gear to perfectly illuminate your battlestation 360-degree lens adjustment, ensuring the ROG logo is always positioned upright Magnetic base for easy attachment to any metal surface Cast your gaming pride ROG Spotlight lets you project the iconic ROG logo with customisable colours, and coordinate light effects with other Aura Sync-enabled gear. Simply attach it to any metal surface using its magnetic base. ROG Spotlight gives your gaming setup a more vibrant look. Fully rotatable A 360-degree rotatable lens ensures the logo is always positioned upright, regardless of where ROG Spotlight is placed. Adjustments can easily be done using a coin as a screwdriver. Outshine the competition Featuring ASUS Aura Sync RGB technology, ROG Spotlight is designed to add some flair to your gaming setup, with a full palette of colours and customisable lighting effects. Sync it with your gaming gear and achieve a brilliant look! Interface USB Weight 123 g LED Type RGB 5050 LED Voltage 5V Project Distance 20cm - 100cm Rotation 360° Dimensions 50mm x 54mm x 30.2mm Products certified by the Federal Communications Commission and Industry Canada will be distributed in the United States and Canada. Please visit the ASUS USA and ASUS Canada websites for information about locally available products. All specifications are subject to change without notice. Please check with your supplier for exact offers. Products may not be available in all markets. Specifications and features vary by model, and all images are illustrative. Please refer specification pages for full details. PCB color and bundled software versions are subject to change without notice. Brand and product names mentioned are trademarks of their respective companies. Unless otherwise stated, all performance claims are based on theoretical performance. Actual figures may vary in real-world situations. Reviews (0) view all back What's in the box 1 x ROG Spotlight USB logo projector with Aura Sync RGB LED You bought an ASUS Aura (Sync) compatible motherboard/graphics card, but you don't know where to download the software to do the lighting control? Don't worry, this article is written for you! What is Aura Sync? Aura Sync software can control the lighting of ASUS Aura RGB products. It can also synchronize lighting with other Aura Sync products to create an integrated lighting effect. These products including motherboards, graphics cards, monitors and peripherals. Here are two ways to download AURA software. 1. Download and install AURA software through the homepage 2. Download AURA program according to ASUS AURA product Bonus: Update ASUS drivers Download and install Aura Sync software through the homepage Go to ASUS's website Click CHOOSE A VERSION and click the latest version. The software will download automatically.Unzip and open the file. Double click Setup and follow the on-screen instructions to finish the installation. Download AURA program according to the ASUS AURA product According to the ASUS AURA product (e.g. motherboard) you have, you can download related AURA software by your product's model name. Go to ASUS downloading center. Type your product's model name to find it. Then click Driver & Tools.Choose your operating system type. And then download the AURA program under Utilities. Bonus: Update ASUS drivers To get a better gaming and lighting experience, it's very important to keep your drivers updated. There are two ways you can download your ASUS devices drivers. Option 1 - Manually - You'll need some computer skills and patience to update your drivers this way, because you need to find exactly the right driver online, download it and install it step by step. OR Option 2 - Automatically (Recommended) - This is the quickest and easiest option. It's all done with just a couple of mouse clicks - easy even if you're a computer newbie. Option 1 - Download and install the driver manually You can download ASUS products drivers from ASUS website. Go to the ASUS download center, enter your model name to find the correct model and choose your specific flavor of Windows system (Windows 10 64-bits or etc.) Then download the driver manually. Option 2 - Automatically update ASUS devices drivers If you don't have the time, patience or computer skills to update the Aura driver manually, you can do it automatically with Driver Easy. Driver Easy will automatically recognize your system and find the correct drivers for it. You don't need to know exactly what system your computer is running, you don't need to worry about making a mistake when installing. You can update your drivers automatically with either the FREE or the Pro version of Driver Easy. But with the Pro version it takes just 2 clicks (and you get full support and a 30-day money back guarantee): Download and install Driver Easy.Run Driver Easy and click Scan Now button. Driver Easy will then scan your computer and detect any problem drivers.Click the Update button next to the driver to automatically download and install the correct version of this driver (you can do this with Free version). Or click Update All to automatically download and install the correct version of all the drivers that are missing or out of date on your system (this requires the Pro version - you'll be prompted to upgrade when you click Update All). Thanks for reading. Hope this article meets your need. And you are welcome to leave comments below.
